# Patient Onboarding – Step 2

Patients fill out HIPAA release forms for each location they have been seen at

If you have switched providers, or need to sign a new HIPAA release form for any reason, please find the form here. Please send the completed form to [records@all4cure.com](mailto:records@all4cure.com) so we can request your medical records for you.

You can also ask for a docusign version of the HIPAA release.

DOWNLOAD HIPAA RELEASE FORM

9435 45<sup>th</sup> Ave. SW  
Seattle, WA 98136

Complete Treatment History

Labs and Outcomes

Demographics

Summarized Medical History

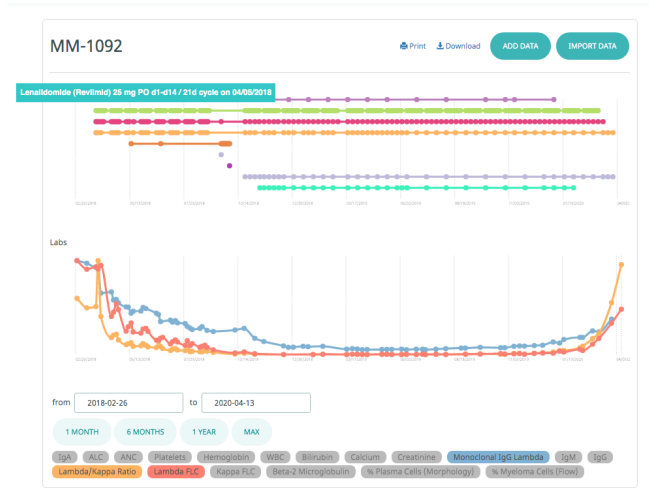

Discussion Panel

The screenshot shows the All4Cure Patient Dashboard for patient MM-599. At the top right, there are buttons for 'Print', 'Download', 'Add Data', and 'Import Data'. The main content is divided into several sections:

- Treatments:** A horizontal timeline chart showing various treatment periods from 2008 to 2019.
- Labs:** A line chart showing laboratory results over time, with a significant spike in 2014.
- Search:** A search bar with the date range 'from 2008-07-15 to 2019-04-01' and a list of lab categories including Monoclonal IgG Kappa, WBC, Platelets, Lambda FLC, Kappa/Lambda Ratio, Kappa FLC, IgM, IgG, IgA, Hemoglobin, Creatinine, Calcium, Bilirubin, ANC, ALC, % Plasma Cells (Morphology), % Myeloma Cells (Flow), Beta-2 Microglobulin, and Monoclonal IgG Lambda.
- About:** A section with an 'Edit' link containing patient demographics: Age 68, Gender female, Diagnosis Multiple Myeloma, Remission, ISS Stage I, Light Chain Kappa, Type IgG, Date of Diagnosis Aug 20, 2008, FISH/Cytogen. t(1;16), and Location Winder, GA, US.
- Summary:** A section with an 'Edit' link providing a detailed medical history. It states that MM-599 was diagnosed with MGUS in August 2008 at age 57. It also mentions a history of hypertension, chronic bronchitis, sinusitis, and a known lung nodule since 1999. A CT scan in March 2015 was stable. Her family history includes ovarian cancer and cervical cancer. She was found to have an abnormal SPEP with a kappa light chain specificity and anemia. A bone marrow biopsy in 2008 showed plasmacytosis of 4%. In 2010, she was diagnosed with ER-positive stage 1 breast cancer (ductal carcinoma) and underwent a lumpectomy followed by radiation from 2009 to 2010.
- Share Identity of this patient with a Clinician:** A section with an 'ADD CLINICIAN' button.
- Documents:** A section with an 'Upload' button.
- Posts:** A section with a search bar and a date filter. A notification at the bottom right states: 'Your dashboard has been updated' on May 07, 2019, by Cristiana Martinho. A message follows: 'Dear MM-599, We are glad to know that you are doing well! Your dashboard has been updated to include the most recent records we have available at the moment. Please let us know if you have any questions or concerns, or if we can be of any help.'

# How can I use All4Cure?

1

Keep track of your medical records in one place

Share your dashboard with your clinicians and family members

2

Patient ID	Gender	Age	Condition	Stage	Monoclonal Protein
MM-209	female	37	Multiple Myeloma	Stage III	IgA
MM-931	male	37	Multiple Myeloma	I don't know	IgG
MM-875	female	37	Multiple Myeloma	Stage III	IgG
MM-785	female	38	Multiple Myeloma	Stage III	IgA
MM-794	female	40	Multiple Myeloma	Plasma Cell Leukemia	IgG

# Unprecedented Clinical Impact

## Amplifying Expert Opinions

61 year-old flight attendant

Treatment suggested by an All4Cure expert worked, allowing patient to **leave hospice** and go onto receive two stem cell transplants.

*Expert opinions have a markedly amplified impact*

## Democratizing Knowledge

70 year-old conservation biologist

Learned that her **treatment differed from other All4Cure participants**. Switched to an All4Cure-recommended oncologist to **receive better treatment**.

*Patients can compare their treatments to other patients*

## Better Informing Reimbursement Decisions

57 year-old judge

All4Cure **reversed a denial for payment worth hundreds of thousands of dollars** based on the experiences of another All4Cure participant.

*Informing reimbursement decisions based on the experiences of other patients*

# Our Next Steps

Build personalized dashboards for patients for them to keep track of their myeloma and learn from other patients

**Leverage All4Cure patients' collective experience to develop All4Cure's Myeloma Map that will dramatically help patients and clinicians to make informed next steps**

# All4Cure

*All4Cure is indivisibly bound to the best interests of the patients who entrust their information to us.*

## **ADVOCACY**

We help patients whenever and in whatever ways we can.

We provide input whenever it may be helpful to our patients.

## **TRANSPARENCY**

We disclose all actual and perceived conflicts of interest.

We disclose any commercial relationship that may be regarded as a conflict of interest

## **EQUALITY**

We give all patients enrolled in All4Cure equal access to the benefits of participation.

We give every All4Cure patient equal access to other All4Cure participants.

## **RESPECT**

We treat all who help our patients with respect.

We invite a diversity of opinions toward finding the best answers for our patients.
